2022
Front End Development
The Odin Project | Self-taught

3 years
Industrial Engineering
Buenos Aires Institute of Technology

Summary

React developer with experience in a fast-paced startup environment. Proficient at building web applications from the ground up with Next.js, React GraphQL, and Tailwind CSS. Proactive and adaptable, with a strong sense of ownership and the ability to perform well in collaborative environments and/or autonomously.

Skills

Languages

- TypeScript
- JavaScript
- HTML5
- CSS

Frameworks

- Next.js
- React
- Redux
- GraphQL
- Apollo
- TailwindCSS

Tools

- Git
- Jira
- Scrum
- Slack
- Github

Experience

React Developer

Spume | Remote
April 2022 - Present

- Used Next.js, GraphQL, and TailwindCSS to build a cross-chain NFT marketplace where users can buy, sell, and mint NFTs.
- Worked closely with CTO and team to implement new features and solutions, taking into account both user and business needs.
- Collaborated with graphic designer to translate Figma prototypes into fully functioning React components
- Built npm module for core utility functions, custom hooks and UI components to be used across multiple web applications.

Personal Projects

Covid Tracker

React - Redux - Chart.js - LeafletMap - APIs - Axios - Material UI

React app that lets users visualize COVID-19 statistics and read the latest news on the topic.

 [Website](#) </> [Code](#)

Disney+ App

React - Redux - Firebase - Styled Components - Slick Carousel

React app that allows users to log onto their account and browse the latest Disney movies.
